## **Environmental Policy Statement**

Richardson Eyres provide design, procurement, configuration and installation of IT systems, based in our offices in Chesham, to a wide range of clients worldwide. We accept responsibility for the harmful effects our operations have on both the local and global environment and we are committed to reducing them. We will measure our impact on the environment, set targets for continual improvement and implement systems to prevent pollution. In seeking to continually improve our impact on the environment we will:

- Implement and maintain an Environmental Management System and achieve and maintain ISO14001 Environmental Management System Standard
- Minimise our carbon footprint by reducing site energy consumption and vehicle fuel use
- Reduce our waste production and recycle materials from our waste streams

We will review annually our performance against these strategic objectives.

We will comply with all relevant environmental legislation.

We will implement a training program for our staff to raise awareness of environmental issues and enlist their support in improving the Company's performance.

We will encourage our Suppliers and Partners to adopt similar principles where appropriate.

We are committed to providing the necessary resources to implement this policy.

Adam Kemp, Managing Director – June 2010
